"Why do guys like to ejaculate all over a woman's body?"

Q I was wondering what the deal is with guys ejaculating on different parts of a girl's body. Why do they get off on that?

A There are a few possible reasons for this bedroom behavior. Many guys are turned on by the taboo factor; there's something a little naughty about ejaculating on your partner. It could also play into a guy's porn fantasy, as this is a common scenario in dirty flicks. There's also the "eye-rotic" element. Since men are so stimulated by sexy visuals, they may get off watching their own ejaculate.

Whatever the reason, if your guy ejaculates on you and you're not into it, tell him. Chances are, he won't find it so erotic if he knows it's turning you off. On the other hand, if you find it arousing, make sure you clue him in, too. After all, the more mutually satisfying acts you have in your repertoire, the more exciting your sack sessions will be.
